

STATE PROJECT NO. H.010157  
F.A.P. NO. H010157  
PROFESSIONAL ENGINEERING SERVICES CONTRACT  
BRIDGE RECORDS PROJECT MANAGEMENT  
STATEWIDE

QUESTIONS AND ANSWERS

- Q1. The Minimum Personnel Requirements items 1 and 2 are different than all standard advertisements by asking the prime consultant as an individual to meet the registration requirements instead of "prime consultant would employ on full time basis ....."?  
A1. This is for a single engineer to perform all the duties as described in the advertisement. The work will be performed at the DOTD Headquarters as well as all the Parish and District offices. Travel will be required. Scanning will be required.
- Q2. The Minimum Personnel Requirements is asking for an engineer with an odd number (**nine**) years of experience. This is a records management project and typically bridge design projects only require five years of bridge design experience.  
A2. Please refer to the Advertisement Addendum which has changed the requirement from 9 years to 10 years of experience.
- Q3. Is the registered engineer expected to travel around the state and do the scanning or could it be done with a staff member under his/her supervision. If yes, would the \$75 rate apply to both individuals? If no, why do you need a registered engineer with nine years of bridge design experience scanning documents?  
A3. Yes, the engineer will be required to perform all duties. Only one person (a licensed engineer) is required.
